# Subject index

accelerometer, exhaustion, impact, locomotion, 911
accumulated oxygen deficit, anaerobic capacity, cycling, 'modified' accumulated oxygen deficit, 155
accumulated oxygen deficit, metabolic acidosis, prior exercise, 13
achievement goals, competence, physical education, self-determination theory, 631
aerodynamics, ball flight, defensive walls, model, soccer, 75
aerodynamics, biomechanics, computer simulation, hammer throw, 21
aerodynamics, efficiency, ergometry, nutrition, pacing, 767
ageing, heart rate responses, master athletes, orienteering, 221
aim point fluctuation, body sway, performance, rifle shooting, 559
alactic anaerobic capacity, alactic anaerobic power, one-repetition maximum, plyometric training, resistance training, vertical jump, 577
alactic anaerobic power, one-repetition maximum, plyometric training, resistance training, vertical jump, alactic anaerobic capacity, 577
Alzheimer's disease, cholesterol, exercise, presenilin, sports, transgenic, 943
amotivation, children, enjoyment, psychometrics, youth, 973
anaerobic capacity, cycling, 'modified' accumulated oxygen deficit, accumulated oxygen deficit, 155
anthropometry, athletes, body image, perception, satisfaction, 815
anthropometry, bilateral symmetry, developmental stability, physical performance, 201
anthropometry, fitness, motion analysis, psychology, talent identification, training, 693
anticipation, ecological validity, implicit learning, temporal occlusion, tennis, 511
anticipation, implicit learning, perceptual training, tennis, 503
anxiety, directional perceptions, individual zones of optimal functioning model, negative affect, positive athlete satisfaction, multidimensional, role ambiguity, affect, self-confidence, 171, 391
athletes, body image, perception, satisfaction, anthropometry, 815
athletic performance, ergonomic aid, injury, jump, sprint, 601
athletics, baton exchange, running, sprinting, 493
athletics, history of sport, running, 429
autonomy-supportive behaviours, interpersonal style, intrinsic motivation, self-determined extrinsic motivation, 883

badminton, racket sports, squash, table tennis, tennis, 707
ball carrying, rugby union, sprinting speed, 1009
ball flight, defensive walls, model, soccer, aerodynamics, 75
ball toss, biomechanics, tennis, 529
balls, clubs, golf course, golf course design, golfer, golf injuries, golf performance, golf turfgrass, 753
basketball shooting, event control, experimental manipulations, liquid crystal goggles, movement, 567
baton exchange, running, sprinting, athletics, 493
batting, bowling, cricket, equipment, fielding, injuries, 733
bilateral symmetry, developmental stability, physical performance, anthropometry, 201
biomagnetism, magnetometry, physiological measurement, SQUID, susceptometry, 793
biomechanics, computer simulation, hammer throw, aerodynamics, 21
biomechanics, crawl, motor coordination, swimming, video analysis, 1025
biomechanics, tennis, ball toss, 529
blood lactic acid, energy expenditure, heart rate, match analysis, rugby league, 97
body image, perception, satisfaction, anthropometry, athletes, 815
body sway, performance, rifle shooting, aim point fluctuation, 559
book review, 877
bowling, cricket, equipment, fielding, injuries, batting, 733
buffering solutions, cycling performance, lactic acidosis, pH, 39

carbohydrate ingestion, intermittent exercise, temperature regulation, 371
cardiac output, immersion, muscle soreness, recovery, shrinkage, 959
causal attribution, intrinsic motivation, peer tutoring, self-efficacy, sex, 539
children, cycling peak power, flywheel inertia, motor learning, reproducibility, 135

oxidative stress, concentric, eccentric, endurance, haem oxygenase-1, heat shock protein, 383
oxygen consumption, heart rate, ventilation, cross-country skiing, energy cost, skating techniques, 3
oxygen uptake, time-trial, ventilatory threshold, high-intensity exercise, highly trained, 411

pacing, aerodynamics, efficiency, ergometry, nutrition, 767
past behaviour, personal norm, physical activity, planned behaviour, self-identity, descriptive norm, 119
peak torque, performance, work rate, eccentric action, 933
pedalling, video, cycling, injury, overuse, 649
peer tutoring, self-efficacy, sex, causal attribution, intrinsic motivation, 539
pelvis, sex, hip, kinematics, lumbar spine, 105
penalty kick, point of no return, soccer, visuo-motor integration, decision-making, motor program, 87
perceived exertion, hamstrings, muscle fatigue, flexibility, 163
perception, satisfaction, anthropometry, athletes, body image, 815
perceptual training, tennis, anticipation, implicit learning, 503
performance, physiological responses, tennis, intermittent exercise, 459
performance, rifle shooting, aim point fluctuation, body sway, 559
performance, running speed, endurance, 479
performance, work rate, eccentric action, peak torque, 933
performance, cycling, glucose, indirect calorimetry, 1017
personal norm, physical activity, planned behaviour, self-identity, descriptive norm, past behaviour, 119
pH, buffering solutions, cycling performance, lactic acidosis, 39
physical activity, planned behaviour, self-identity, descriptive norm, past behaviour, personal norm, 119
physical activity, training impulse, immunity, immunoglobulin G, 991
physical education, self-determination theory, achievement goals, competence, 631
physical fitness, young athletes, differences between the sexes, motor performance, 551
physical performance, anthropometry, bilateral symmetry, developmental stability, 201
physiological measurement, SQUID, susceptometry, biomagnetism, magnetometry, 793
physiological responses, tennis, intermittent exercise, performance, 459
physiological working capacity, recovery, endurance athletes, exercise testing, fatigue, 29
planned behaviour, self-identity, descriptive norm, past behaviour, personal norm, physical activity, 119
playing positions, seasonal changes, standard of competition, time–motion analysis, Yo-Yo intermittent recovery test, high-intensity intermittent exercise, 519
plyometric training, resistance training, vertical jump, alactic anaerobic capacity, alactic anaerobic power, one-repetition maximum, 577
point of no return, soccer, visuo-motor integration, decision-making, motor program, penalty kick, 87
positive affect, self-confidence, anxiety, directional perceptions, individual zones of optimal functioning model, negative affect, 171
power training, strength, stretch–shorten cycle, electromyography, functional performance, kinematics, 59
power, rate of force development, strength, concentric, 49
power, speed, vertical jump, diving, force, 213
pre-performance routines, rugby goal kicking, 803
presenilin, sports, transgenic, Alzheimer's disease, cholesterol, exercise, 943
prior exercise, accumulated oxygen deficit, metabolic acidosis, 13
psychology, talent identification, training, anthropometry, fitness, motion analysis, 693
psychometrics, youth, amotivation, children, enjoyment, 973

quadriceps, eccentric exercise, length–tension relationship, muscle damage, 927

racket sports, squash, table tennis, tennis, badminton, 707
rate of force development, strength, concentric, power, 49

recovery, resistance exercise, submaximal exercise, cortisol, leukocyte, noradrenaline, 1001
recovery, shrinkage, cardiac output, immersion, muscle soreness, 959
recovery, endurance athletes, exercise testing, fatigue, physiological working capacity, 29
reproducibility, children, cycling peak power, flywheel inertia, motor learning, 135
resistance exercise, submaximal exercise, cortisol, leukocyte, noradrenaline, recovery, 1001
resistance training, vertical jump, alactic anaerobic capacity, alactic anaerobic power, one-repetition maximum, plyometric training, 577
rhabdomyolysis, electromyography, muscle damage, muscle strength, 403
rifle shooting, aim point fluctuation, body sway, performance, 559
rock climbing, finger endurance, finger strength, isometric exercise, 621
role ambiguity, athlete satisfaction, multidimensional, 391
rowing, lower limbs, muscle mass, 905
rugby goal kicking, pre-performance routines, 803
rugby league, blood lactic acid, energy expenditure, heart rate, match analysis, 97
rugby ratings, statistical process control, multivariate analysis, 611
rugby union, sprinting speed, ball carrying, 1009
running speed, endurance, performance, 479
running, sprinting, athletics, baton exchange, 493
running, athletics, history of sport, 429

satisfaction, anthropometry, athletes, body image, perception, 815
seasonal changes, standard of competition, time–motion analysis, Yo-Yo intermittent recovery test, high-intensity intermittent exercise, playing positions, 519
self-confidence, sport performance, cognitive anxiety, meta-analysis, 443
self-confidence, anxiety, directional perceptions, individual zones of optimal functioning model, negative affect, positive affect, 171
self-determination theory, achievement goals, competence, physical education, 631
self-determined extrinsic motivation, autonomy-supportive behaviours, interpersonal style, intrinsic motivation, 883
self-efficacy, sex, causal attribution, intrinsic motivation, peer tutoring, 539
self-identity, descriptive norm, past behaviour, personal norm, physical activity, planned behaviour, 119
sex, causal attribution, intrinsic motivation, peer tutoring, self-efficacy, 539
sex, hip, kinematics, lumbar spine, pelvis, 105
shrinkage, cardiac output, immersion, muscle soreness, recovery, 959
simulation, turns, electromyography, equipment, hills, 679
skating techniques, oxygen consumption, heart rate, ventilation, cross-country skiing, energy cost, 3
skill, focus of attention, golf, motor performance, 593
soccer, visuo-motor integration, decision-making, motor program, penalty kick, point of no return, 87
soccer, aerodynamics, ball flight, defensive walls, model, 75
soccer, cueing, discrete task, football, modelling, observational learning, 825
soccer, isokinetic strength, magnetic resonance imaging, muscle cross-sectional area, 851
speed, vertical jump, diving, force, power, 213
sport performance, cognitive anxiety, meta-analysis, self-confidence, 443
sport, training, visual feedback, knowledge of performance, knowledge of results, 867
sports, transgenic, Alzheimer's disease, cholesterol, exercise, presenilin, 943
sprint, athletic performance, ergonomic aid, injury, jump, 601
sprinting speed, ball carrying, rugby union, 1009
sprinting, athletics, baton exchange, running, 493
squash, table tennis, tennis, badminton, racket sports, 707
SQUID, susceptometry, biomagnetism, magnetometry, physiological measurement, 793
standard of competition, time–motion analysis, Yo-Yo intermittent recovery test, high-intensity intermittent exercise, playing positions, seasonal changes, 519
statistical process control, multivariate analysis, rugby ratings, 611
strength, stretch–shorten cycle, electromyography, functional performance, kinematics, power training, 59
strength, concentric, power, rate of force development, 49
stretch–shorten cycle, electromyography, functional performance, kinematics, power training, strength, 59
subjective judging, crowd noise, officiating, 469
submaximal exercise, cortisol, leukocyte, noradrenaline, recovery, resistance exercise, 1001
susceptometry, biomagnetism, magnetometry, physiological measurement, SQUID, 793
swimming, video analysis, biomechanics, crawl, motor coordination, 1025

table tennis, tennis, badminton, racket sports, squash, 707
talent identification, training, anthropometry, fitness, motion analysis, psychology, 693
temperature regulation, carbohydrate ingestion, intermittent exercise, 371
temporal occlusion, tennis, anticipation, ecological validity, implicit learning, 511

tennis balls, tennis rackets, dynamic testing, feel, tennis, 839
tennis rackets, dynamic testing, feel, tennis, tennis balls, 839
tennis, tennis balls, tennis rackets, dynamic testing, feel, 839
tennis, anticipation, ecological validity, implicit learning, temporal occlusion, 511
tennis, anticipation, implicit learning, perceptual training, 503
tennis, badminton, racket sports, squash, table tennis, 707
tennis, ball toss, biomechanics, 529
tennis, intermittent exercise, performance, physiological responses, 459
time–motion analysis, Yo-Yo intermittent recovery test, high-intensity intermittent exercise, playing positions, seasonal changes, standard of competition, 519
time-trial, ventilatory threshold, high-intensity exercise, highly trained, oxygen uptake, 411
trained swimmers, inspiratory muscle fatigue, maximal inspiratory pressure when supine, maximal inspiratory pressure when upright, 659
training impulse, immunity, immunoglobulin G, physical activity, 991
training, visual feedback, knowledge of performance, knowledge of results, sport, 867
training, anthropometry, fitness, motion analysis, psychology, talent identification, 693
training, cycling, duration, force, muscle, 191
transgenic, Alzheimer's disease, cholesterol, exercise, presenilin, sports, 943
turns, electromyography, equipment, hills, simulation, 679
ventilation, cross-country skiing, energy cost, skating techniques, oxygen consumption, heart rate, 3
ventilatory threshold, high-intensity exercise, highly trained, oxygen uptake, time-trial, 411
vertical jump, alactic anaerobic capacity, alactic anaerobic power, one-repetition maximum, plyometric training, resistance training, 577
vertical jump, diving, force, power, speed, 213
video analysis, biomechanics, crawl, motor coordination, swimming, 1025
video, cycling, injury, overuse, pedalling, 649
visual feedback, knowledge of performance, knowledge of results, sport, training, 867
visuo-motor integration, decision-making, motor program, penalty kick, point of no return, soccer, 87

wheelchair ergometer, manual hand rim propulsion, maximal power, 921
work rate, eccentric action, peak torque, performance, 933
World Commission of Science and Sports, electromyography, film analysis, history, kinesiology, 669

young athletes, differences between the sexes, motor performance, physical fitness, 551
youth, amotivation, children, enjoyment, psychometrics, 973
Yo-Yo intermittent recovery test, high-intensity intermittent exercise, playing positions, seasonal changes, standard of competition, time–motion analysis, 519
